Dear Mr. Otys,

I have read your letter very carefully. I am extremely concerned with your letter and take it very seriously. In fact, I would like to know more about your complaint.

In your letter you refer often to "ITTF Officials" and the "ITTF". I would like you to be more specific and let me know exactly who you mean. I would also like you to give me concrete examples of interference by ITTF officials. Do you mean that some ITTF officials impose their own ideas on the coaches? Or do you mean that the rules as they are currently written are in themselves an interference to the autonomy of the national association? Please explain to me clearly. Also please relate your complaint directly to the report you read by indicating which sections and why it is an interference.

The ITTF's position, and fully backed by our Executive Committee, is not to interfere in any training or internal decisions made by the national associations. In fact, our role is to offer competition opportunities, educational opportunities and marketing opportunities to our member national associations. It is not our mandate to interfere with any matters that belong to the national association, of which many of them you have listed. However, based on your letter I cannot assess the actual interference that you describe. I would need more precise examples.

I take your complaint very seriously and I want to find out more so that I can discuss your complaint, and hopefully further explanation, with our EC and our staff and make the necessary changes and corrections if justified. But to know if they are justified I need much more information and hope you will provide it soon. Please feel free to be specific and name the ITTF Officials to whom you refer. We are one family and we can resolve our issues, but we need to be open. Based on the letter you sent alone, it raises concern, but it is not specific enough for me and our EC to be able to deal with the issue.

I thank you for bringing this matter to our attention and I await further specific information from you before I can take this matter any further.

It would also be my pleasure to meet with you in Tokyo at the WTTC to discuss this complaint and your overall recommendations to make our PTT program better.

Sincerely,

Adham Sharara
President
